## **RATES AND PROGRAM ESIMTAES**

Dear ICA Students,

Our great summer season is almost here and we're excited for more flying! We've made significant strides since our management change in March. As of **June 1st**, we've updated our prices lower to better align with the market and our operating costs.

Here's what you need to know:

- **Annual Price Adjustments:** Prices will now be adjusted annually starting March 2025, with the fuel surcharge fluctuating based on rates from our main fuel supplier, Aero Club BC.
- **May Rebate:** If you paid higher rates for aircraft or instructors in May, please contact our team for a non-refundable rebate.

**Please Note:**

- **Program Estimates:** All program estimates are based on Transport Canada's minimum requirements and do not include incidental fees (e.g., aviation medical, flight tests), textbooks/materials, or any additional training required.
- **Instructor Rates:** Estimates are based on a Class 4 instructor. However, some training may necessitate a different instructor class with a varying rate, not included in the estimate.
- **Additional Fees:** All rates are in Canadian dollars (CAD), do not include applicable taxes, and are subject to change. A registration fee applies to all programs for both domestic and international students.
- **Contract Enforcement:** All student who is or will be enrolled in (CPL, FIR or 15/50 hrs Seaplane training) are required to have an updated contract.

We value your experience in the ICA community and are excited about the future as we continue to serve you in the possible way.

Sincerely,  
Island Coastal Aviation Management Team

## ICA License Conversion and Validation

For **FAA conversion** candidate, there is only a conversion test and no flight test required. If candidates require ICA to provide assistance on passing the test or familiarization training, We will be delighted to offer services according to the hourly rate.

For **Non-FAA** license validation candidate, there is no flight test and no written test. Candidates only need to follow procedures similar to acquiring a **Student Pilot Permit** and fulfill the requirement set by Transport Canada (TC).

For **Non-FAA CPL** conversion candidate, both written test and flight test are required. Candidates need to follow procedures similar to acquiring a **Student Pilot Permit** and prepare for the flight test and written test. Candidates usually require at least **20hrs dual and 5 hrs of solo** in order to familiarize themselves with TC flight test standards. Feel free to refer our **RPP program cost** as a reference for conversion costs on the flight training part since they have the same estimated required hours.

For details about Licensing requirements, feel free to refer to CARS- Standard 421 for further information or contact ICA.
